All foals registered in 1998 must be DNA typed. Sire and dam must be DNA typed as well.

**DNA Typing Sire/Dam from existing samples**

Once foals begin to be DNA typed, the Sire and Dam must be DNA typed as well to perform a parentage verification. The cost for UC Davis to DNA type from existing blood samples is \$25.

**Bloodtyping Kit/DNA Testing**

The registration of a horse may require that both Blood typing and DNA testing be done for purposes of parentage verification.

**Late Stallion Report:**

For reports received after December 31. There is no charge for reports mailed prior to this date.

**Other Breed Added to Certificate**

For the Registration Certificate of a Registered or Recorded Crossbred. A copy of the certified pedigree of the other breed is required. Old USLR crossbred Certificates may be updated for the same price.

**Parentage Verification from other lab**

The USLR now has the ability to produce parentage verifications for horses typed at various labs. No genetic samples need to be taken. The fee covers the cost of coordinating the markers and the resulting PV. This is done on a case by case basis. The fee is per horse.

See General Registration Requirements on back. For detailed requirements, please refer to your Membership Directory and the section entitled USLR Requirements and Procedures.
